

STAFF REPORT

AGENDA ITEM: OHMVR Commission Workshop

STAFF: Phil Jenkins, Chief, OHMVR Division

DATE: August 6, 2011

Issue: The Commission desires to hold an interactive workshop with the public to gather feedback and discuss goals and objectives of the Commission for the next year. This effort will help the Commission prioritize items it wishes to address.

Background: The OHMVR Division Strategic Plan was developed based on a shared vision between the Commission and Division. It lays out six goals and associated objectives that the Commission and Division developed to advance the OHMVR Program. These Goals and Objectives are used by the Division in collaboration with its stakeholders, other agencies, and interested parties to develop and manage work plans and projects.

The Strategic Plan is a comprehensive planning document and the product of a collaborative-oriented study and analysis, public comment, examination of OHV trends, professional expertise, and significant input from the OHMVR Commission.

Discussion: To help facilitate the discussion, the OHMVR Commission may wish to review the Strategic Plan Goals and Objectives in workshop discussions related to current conditions and issues facing the OHMVR Program.

Commission Action: To be determined by the Commission.
